MICROBLADING / \$500

Microblading is the name used to define a non invasive procedure that applies semi permanent eyebrows to your existing brows. This procedure helps transform your existing eyebrows and gives you the appearance that you have make up on 24/7. Due to the process of Microblading it also allows for perfect shaping of your eyebrow all year long.

Many women love the fact that they can customize their brow before we put the pigment on and make it last for over a year.

In fact many of my clients mention that people notice something "different" about them, but they can't put their finger on it.

SPECIAL Treatments

Eye Brow Lamination & Tinting / \$115

Brow laminations are great for filling gaps, adding definition, and giving the illusion of more hair to sparse brows. Is a three-step treatment meant to straighten out the brow hair.

Eye Lash Lifting & Tinting / \$115

It's like a perm (but without chemicals like parabens or formaldehyde), for your natural eyelashes. It uplifts and curls them from the base of the lash, making them stand out and look longer.

It's often paired with an eyelash tint, to enhance the defining effect. When finished, your eyes look larger, your lashes look longer and fuller, and your entire face looks uplifted.
